

Space, Galactic, Solar System, Earth  
Ether Stream

Our Galaxy

North Direction of Space

Milky Way Ether Stream

etc...

Sun

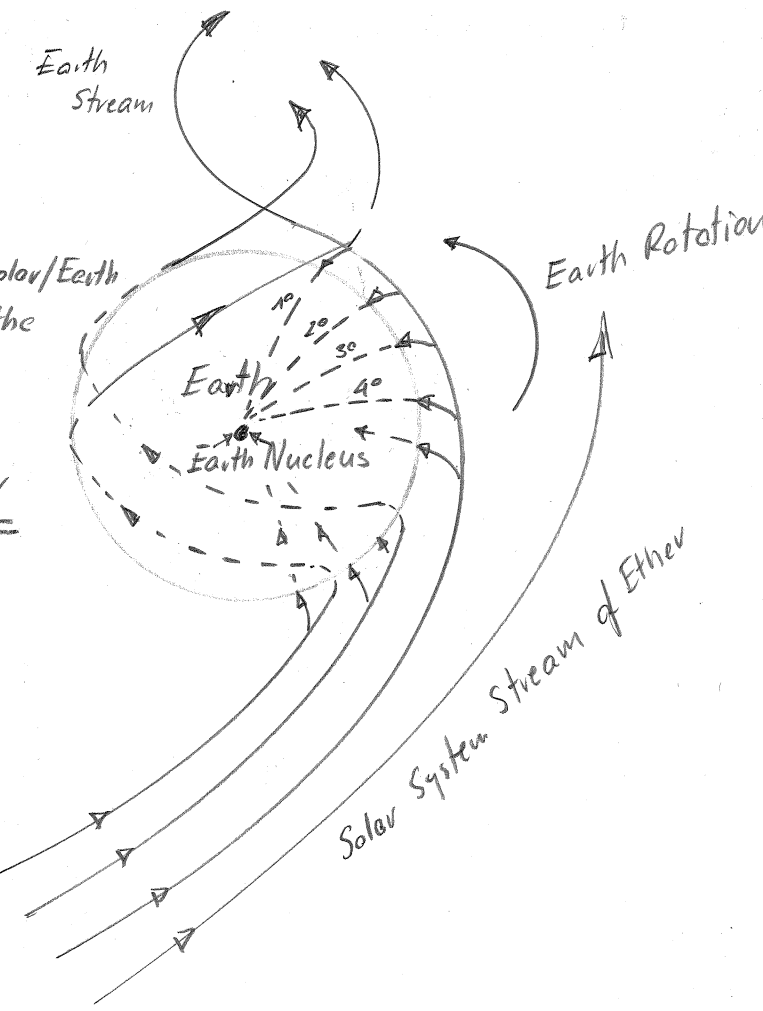

Earth

Smaller Earth Ether Stream

Solar System Ether Stream

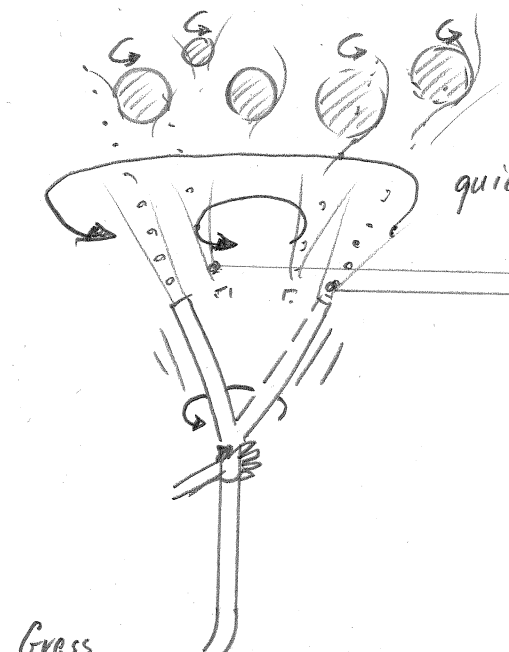

1°, 2°, 3°, 4°  
Curved over Earth Parts of Solar/Earth  
Streams of Ether speed to the  
Center (Nucleus) of Earth  
making gravity.

Gravity = Stream of Ether  
going in to the Center  
of Earth from deep  
South of Space

Ether is Strongly Attracted by  
Nuclear Material by almost Each (living)  
Planet into their Nucleus to the  
moment of total balance (burn out)  
some such in Nuclear Plants made  
by mankind.  
MULL where we are living its substance  
of long time burned nuclear material.  
Because process is still going MULL of our  
Earth is still growing (extending)

Water Model of Galaxy

Balls (planets) "dancing" in air by water stream

quick rotation of water stream (ether stream)

Stream of water  
from garden pipe

Gross

All Space streams making  
rotation of all planets and  
other cosmic bodies and pushing  
its by rotation to north of space.

Magellan Cloud

Ether Flow/Stream  
with stous matter

Direction — South of Space  
Ecliptic

"No real proportions"
